Envorso Technical Director

Certified Atlassian Consultant

Previously:

CTO of an Atlassian Partner

Certified Scrum Master and Program Manager

Software Developer

Project Management Methodologies

Question #1

Which methodology is better?

Traditional Project Management software was designed around Waterfall. Every step is planned in advance.

Example: delivering cars with working breaks.

Agile in a nutshell: people over processes, ship early, don't trust customers to know what they want, refine & improve.

Examples:

- Monthly newspaper
- Onboarding process in a company
- Spotify app on your phone

Jira

Question #2

What is Jira?

Atlassian is a company focused on unleashing the power of every team! Flagship products: Jira, Jira Align, Confluence, Bitbucket.

Jira started as a simple issue and bug tracker for developers. Over the years, Jira expanded its capabilities. Today, Jira is used by teams across different industries.

Jira Competitors: Asana, MS Project, monday.com, Trello, Rally, Jama, Freshworks

Main Components

Question #3

What does the following JQL query return:

project = "Avengers" AND priority = "High" AND

resolution = Unresolved?

All main components are customizable in one way or another:

- Projects
- Issues
- Workflows
- Boards
- Custom fields
- Issue links
- Jira Query Language

Kanban Projects

Question #4

What does the term Kanban originally mean in Japanese?

Usually used when there is a continuous flow of work.

Main Components

- Backlog
- Kanban Board
- Work In Progress (WIP) Limits

Meetings

- Daily Status Meetings
- Optional Retrospectives
- Optional Backlog prioritization

Reports

- Cumulative Flow Diagram
- Average Age Report
- Created vs. Resolved Issues Report

Good Practices

Question #5

Should you choose to receive notifications for any Jira issue you're remotely involved in?

- Are we delivering continuously or at the end of the project?
- Use standardized Issue Types and Workflows
- Collaborative Communication (@mentions, Confluence links)
- Save time with Automations
- Consistency
- Training and Support
